### Opening a new page

Tap  → **New tab**.

To go to another webpage, Tap the title field tab. If multiple pages are open, scroll left or right on the tab, and then Tap the title.

### Bookmarks

To bookmark the current webpage, Tap  → **Save**.

To open a bookmarked webpage, Tap  → **Bookmarks**, and then select one.

### Searching the web by voice

Tap  and then speak a keyword. The keyword search results will be displayed so select the page that you want to view.

## Bluetooth

Bluetooth creates a direct wireless connection between two devices over short distances. Use Bluetooth to exchange data or media files with other devices.

- SoftBank Mobile Corp. is not responsible for the loss, interception, or misuse of data sent or received via the Bluetooth feature.
- Always ensure that you share and receive data with devices that are trusted and properly secured. If there are obstacles between the devices, the operating distance may be reduced.
- Some devices, especially those that are not tested or approved by the Bluetooth SIG, may be incompatible with your device.
- Do not use the Bluetooth feature for illegal purposes (for example, pirating copies of files or illegally Tapping communications for commercial purposes). SoftBank Mobile Corp. is not responsible for the repercussions of illegal use of the Bluetooth feature.

To activate Bluetooth, on the Applications list, Tap **Settings** → **Connections** → **Bluetooth**, and then Drag the **Bluetooth** switch to the right.

### Pairing with other Bluetooth devices

On the Applications list, Tap **Settings** → **Connections** → **Bluetooth** → **Scan**, and detected devices are listed. Select the device you want to pair with, and then accept the autogenerated passkey on both devices to confirm.

### Sending and receiving data

Many applications support data transfer via Bluetooth. An example is **Gallery**. On the Application list, open **Gallery**, select an image, Tap  → **Bluetooth**, and then select one of the Bluetooth devices. After that, accept the Bluetooth authorization request from the other device to send the image.

When another device sends you data, accept the Bluetooth authorization request made by another device. Received files are saved in the **Download** folder. If a contact is received, it is added to the contacts list automatically.

## Screen Mirroring

Use this feature to connect your device to a large screen with an AllShare Cast dongle or HomeSync and then share your contents. You can also use this feature with other devices that support the Wi-Fi Miracast feature.

- Miracast-enabled devices that do not support High-bandwidth Digital Content Protection (HDCP 2.X) may not be compatible with this feature.
- Some files may be buffered during playback, depending on the network connection.
- To save energy, deactivate this feature when not in use.
- If you specify a Wi-Fi frequency, AllShare Cast dongles or HomeSync may not be discovered or connected.
- If you play videos or games on a TV, select an appropriate TV mode to get the best experience.

On the Applications list, Tap **Settings** → **Connections** → **Screen Mirroring**, and then Drag the **Screen Mirroring** switch to the right. Select a device, open or play a file, and then control the Display with the keys on your device. To connect to a device using a PIN, Touch & Hold the device name to enter the PIN.
